

## 2.1P: In Person Check-in 1 – Answer Sheet

1. Briefly describe your prior experience with programming.

*I enrolled and passed two COS10009 – Introduction to Programming last semester, so I have some basic ideas about structural programming, as well as about some programming languages such as Ruby, Python, and C.*

2. Based on what you have seen so far, what do you think will be most challenging about this unit?

*As my aiming for a HD grade, I personally think the most challenging about this unit is the Research Project, which demonstrates my understanding related to the unit's topics and concepts.*

3. What can you do to prepare yourself for that challenge (resources you can use, approach to studying etc.)?

*Just like last semester, I think the best way to achieve my goals for this unit is to self-learning, with discussions with tutors and classmates. Also, searching for resources on the Internet or in the library of the university is important as well.*

4. Is there anything you think the teaching staff should know to best help you this semester?

*In fact, I have no experience with OOP before, so I will need a great deal of help for the tutors, to complete all the requirements of this unit and get a high grade.*
